

# Jose Ruben Lopez Menjivar.

Full-Stack / Backend Engineer | Laravel + Node.js | React/Next.js

I am a software Engineer with 10+ years of backend experience across PHP ecosystems and Node.js, building APIs and scalable services. Over the past three years, I've expanded into Android development and data-driven apps using MySQL, SQLite, and Firebase. Comfortable with monitoring and delivery pipelines using Datadog, GitLab CI, and Terraform.

## Experience

### Full Stack Developer - uSource From June 2025 – Present

I worked as a Full-Stack Developer at uSource, with a strong focus on web frontend development (Laravel Livewire, React, and Next.js). I delivered interactive, responsive UI experiences, implemented complex workflows, and ensured smooth integration between frontend components and backend services. I also contributed to backend development in PHP/Laravel, building and maintaining core features, improving maintainability, and supporting the product's end-to-end functionality.

### Senior PHP Developer - Indeed (Contractor) From January 2022 – May 2025

I started at Indeed as a PHP Developer, focusing on resolving security vulnerabilities and optimizing existing backend services. Over time, my role expanded to include Java, Node.js, and Python development, contributing to the enhancement and creation of new features for internal tools and services.

- Developed and maintained backend services using PHP, ensuring **security and performance improvements**
- Assisted in building **AWS** infrastructure components for Project Bell using Terraform, improving cloud resource management
- Integrated **PagerDuty** alerts via **Terraform**, enhancing monitoring and incident response

### PHP and Android Developer - TELUS International From November 2013 – 2021

At TELUS International, I worked as a PHP and Java (Android Studio) Developer, focusing on the development and maintenance of an internal social network. My responsibilities included full-stack development, mobile application enhancements, and cloud migration efforts.

- Designed and implemented **Android mobile applications** using Java (Android Studio) to extend the social network's functionality to mobile users.
- Created and customized various social network modules, such as **Mood, Polls, Surveys, Gaming, Hashtag Restrictions, and Privacy Settings.**
- Enhanced the **OsTicket** ticketing system to meet business requirements
- Implemented modifications and optimizations in **Symfony-based** applications. environment
- I've worked in parking **mobile app** (Phonegap framework and android JAVA).

This experience allowed me to strengthen my expertise in **backend development**, API integration, mobile application development, and **cloud migration**, all within the context of a dynamic and feature-rich internal social network.

## Education

- **University:** 5°Year BA. Computer science (Universidad Luterana Salvadoreña).
- **Systems Technician.** ITCA FEPADE
- **High School:** Complejo Educativo Caserio el Barrio.
- **Basic Education:** Complejo Educativo Caserio el Barrio.

## Skills

- PHP
- Node.js (Backend)
- Nex js
- React js
- MYSQL, SQLite
- Ajax, JQuery Legacy front-end
- Boonex, Wordpress, Joomla, Drupal, OSTicket, Symfony, Laravel, Codeigniter
- Android, Phonegap
- HTML5
- CSS3
- GIT
- Scrum
- REST APIs (Node.js, Laravel)
- Firebase
- GCP
- Terraform
- PagerDuty
- Datadog
- Scrum & Agile Methodologies

## Aptitudes and attitudes

- Availability
- Respectful
- Dynamic
- Persistent
- Creative
- Be progressive
- Initiative
- Teamwork
- Planning/Organising

## Languages

**Spanish : Native**

**English : (B1/B2)**
